

Bowen Zhao

San Juan, Alicante, Spain · +34 675 260 089 · zhaobowen622@gmail.com · [LinkedIn](#) · [Portfolio](#)
Languages: Mandarin Chinese (Native) · Cantonese (Native) · Spanish (Professional) · English (Professional)

PROFESSIONAL SUMMARY

IT Systems & Infrastructure Technician with dual qualifications in Network Systems Administration (ASIR) and Multiplatform Application Development (DAM). Experienced in Windows/Linux environments, TCP/IP networking, system administration, and infrastructure automation using Docker and Bash. Proven ability to independently deploy, monitor, and maintain server infrastructure. Native Mandarin and Cantonese speaker with professional proficiency in Spanish and English — well suited for roles requiring collaboration with international and Asia-based teams.

PROFESSIONAL EXPERIENCE

Junior Web Developer — Intern | Pentapps — Alicante, Spain *Mar 2025 – Jun 2025*

- Built and maintained full-stack web applications using REST API integrations and version-controlled Git workflows.
- Debugged and optimized existing codebases, improving application performance and reliability.
- Collaborated with a cross-functional development team in an agile environment.
- Configured and managed network infrastructure and firewall rules to ensure secure and reliable connectivity across the development environment.
- Set up and configured virtual containers and a Proxmox server to support development and testing environments.
- Led migration of legacy warehouse management database access software to a modern programming language, enabling continued warehouse operations with improved long-term maintainability and support.
- Implemented new features and performed debugging for a warehouse worker check-in application used to track staff attendance and shift management, enhancing reliability and user experience.

IT Support Technician (incl. 2-month sick leave cover) | Metaenlace Sistemas de Información (on-site at Sprinter Megacentro del Deporte) — Alicante, Spain *Mar 2023 – Aug 2023*

- Provided technical support across Windows and Linux environments, resolving hardware, software, and OS incidents.
- Performed network troubleshooting including LAN connectivity, DNS resolution, and device configuration.
- Delivered on-site and remote IT support across multiple warehouse departments (logistics, design, operations), managing incident tickets and escalations.
- Maintained and repaired warehouse logistics scanners used for stock management and order picking.
- Authored a technical handbook covering scanner setup, configuration, and update procedures for warehouse staff.
- Provided remote IT support for international locations (including stores in the Netherlands), handling hardware diagnostics, software updates, and coordinating device repairs across language barriers.

Retail Assistant | Mercamigo — Alicante, Spain *Jan 2021 – Jun 2024*

- Customer service, inventory management, team collaboration, and daily operations.

PROJECTS

Personal IT Infrastructure & Monitoring System

- Designed and deployed a Linux-based home server running multiple containerised services via Docker.
- Automated service deployment, backups, and system health checks using Bash scripting.
- Managed LAN networking, storage configuration, firewall rules, and system security.
- Built a JavaFX desktop dashboard to monitor Docker containers, services, and APIs in real time.

Technologies: *Linux (Debian/Ubuntu), Docker, Bash, Networking, Virtualization, Java, JavaFX, REST APIs*

Media Service Monitoring Dashboard

- Developed a desktop application integrating Docker Engine API and multiple REST APIs for real-time service monitoring and control.
- Focused on automation, service availability tracking, and system observability.

Technologies: Java, JavaFX, Docker Engine API, REST APIs, Linux

TECHNICAL SKILLS

Networking: TCP/IP, VLAN, VPN, LAN/WAN, DNS, DHCP, Enterprise Wi-Fi, Firewall configuration

Systems: Windows Server, Active Directory, Office 365, Linux (Debian, Ubuntu), Android

Infrastructure: Docker, Bash scripting, Virtualization, System monitoring, Backup strategies

Development: Java, C#, JavaScript, HTML/CSS, SQL — Frameworks: .NET, JavaFX, Node.js

Databases: MySQL, SQLite, MongoDB

Tools: Git, Docker, Android Studio, REST APIs, DevOps fundamentals

Currently learning: Python, Rust, Go, C++

EDUCATION

Higher Technical Diploma — Multiplatform Application Development (DAM) | IES Doctor Balmis — Alicante 2023 – 2025

Education focusing on Software Development. Covers object-oriented programming, database design, web and mobile application development, and software engineering fundamentals across multiple platforms (Java, C#, JavaScript, Android).

Higher Technical Diploma — Networked Computer Systems Administration (ASIR) | IES Doctor Balmis — Alicante 2021 – 2023

Education focusing at IT Systems & Networking. Covers Windows/Linux server administration, Active Directory, TCP/IP networking, VLANs, VPNs, firewall configuration, virtualisation, and IT infrastructure management.

Intermediate Technical Diploma — Microcomputer Systems & Networks (SMR) | IES Mutxamel — Alicante 2017 – 2019

Education focusing at PC hardware assembly and repair, operating system installation and configuration, basic networking, and technical user support.
